DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 35, 38, 39 and 42 drawn to a method comprising transforming a plant with a nucleic acid comprising a sequence which encodes a fatty acid hydroxylase, classified in class 800, subclass 281.
 - II. Claims 36, 37, 40 and 41, drawn to a method comprising transforming a plant with a nucleic acid comprising a sequence which encodes a mutated fatty acid hydroxylase, classified in class 800, subclass 281.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II are directed to distinct processes, wherein Invention I requires a hydroxylase coding sequence, while Invention II requires a mutated hydroxylase coding sequence. Therefore, each requires different starting materials and results in different effects and the patentability of one would not render the other obvious or unpatentable.

1. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by the requirement for different searches, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Art Unit: 1638

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
